

👤 SUMMARY

My journey with technology and software development began 24 years ago. I witnessed the the rise and fall of various innovations and I was able to literally grow in sync with all the technological developments of our modern days.

In the accomplishment of any given project, I always take to heart the principle of best practice, using the most recent and most effective languages/suitable tools according to the project's requirements. That's why I decided to adopt **Javascript** for the past 5 years, since it's community is great in getting more organised and the language standards are getting better and better every day.

My most recent tech stack for the last 5 years is **NodeJS, React, React Native, Jest, MongoDB & Docker**.

I consider myself as a Full-stack Developer. I really enjoy working on backend, mobile and infrastructure side as well with **JavaScript (TypeScript)**. I like to build and maintain applications.

👤 MAIN FOCUSES & CONFIDENCE

JavaScript (Typescript)	React Native
NodeJS	Graphql
Github Actions	Jest
Docker	AWS

📁 SOME EXPERIENCES

Full-stack Developer 2019 - Present
Nuri Bank (Ex Bitwala) / Berlin

Mostly worked on backend & mobile app. Created and maintained native modules (React-Native) for internal use (private and opensource). Created and maintained build & release pipeline via Github Actions and Buildkite

React Native Typescript Graphql MongoDB NodeJS Github Actions Buildkite Fastlane

Objective-C Java

Full-stack Developer 2015 - 2019
Self-Employed

Developed web apps as a freelancer. Focused on JavaScript. Slightly changed environment from PHP to JavaScript.

React Redux NodeJS PHP MySQL MongoDB C++ Photoshop Lightroom Premiere

Lead Technical Director 2012 - 2015
Portalgrup / Istanbul

Started out as IT & Security Specialist. Assumed the responsibility of the developer teams within a few months (CTO). Led high scale projects for Bayer, Avea & Turk Telekom (one of the major GSM companies in Turkey), Kibar Holding, Uluooy, Turkish Society of Cardiology, Dogus Holding among many other projects for customers.

NodeJS PHP MySQL MongoDB PostgreSQL Python nginx Apache Redis Bootstrap

JQuery Yii Memcache Varnish

Full-stack Developer 2008 - 2012
Self-Employed

Developed custom web apps to clients such as online ERP, online sales & reporting tools, web auction apps. Focused on cryptology and blockchain. Created unique projects. Designed and maintained mysql and nginx farms for customers

DHTML PHP MySQL Prototype JS PostgreSQL Python nginx Apache Varnish C++ JQuery

Software Developer 2007-2008
Index Group

Member of the ERP development team and deputy technical manager.
(Used: Delphi, Microsoft SQL, Star Team SCM etc.)

Delphi Microsoft SQL Star Team PHP

IT Specialist 2002 - 2006
Index Group

Responsible for network, data and server security. Network and server infrastructure. Developed apps for internal use.
(Certificates: MCP, MCSE, MCDDBA, Norton Security Certificate, Linux Administration, Security Administration)

🎨 CREATIVE PAUSE BREAKS

During my creative time out, I pursued a variety of artistic and spiritual endeavours in different countries, some of which are

- creating various photography works and seminars, producing and directing a creative competition in photography, completing unique nude-art exhibition projects.
- writing essays, short stories, novels, articles etc.
- creating over a hundred oil and acrylic paintings on big canvas, more than half of which I successfully sold online to customers from different countries,
- joining street performances and contributing to street music artists
